## Aims and objectives of TIAF

The Tokyo International Art Festival (TIAF) was first established on January 7, 2013 to achieve a wider and broader access to international art exhibitions. We aim to give a platform for a diverse variety of talented, solid reputation contemporary artists from around the world to display their artwork in Tokyo. The sharing of interesting ideas and approaches to the pursuit of beauty and self-expression by people from many different backgrounds and cultures will inspire the imagination of each person who attends. We are grateful for the enthusiastic participation of many innovative artists and of people who appreciate beautiful and meaningful art, helping to position the Tokyo International Art Festival to come as one of Tokyo's most widely appreciated and celebrated art festival events.
